

PatientTrends®

PatientTrends® are syndicated reports that collect valuable insights from patients themselves. Focus is on disease awareness, how patients access information, the interaction between patients and healthcare professionals, comanagement of their condition by multiple specialties and awareness, use and unmet needs in the area of patient education and support. Methodology is chosen based on patient group demographics.

2011 Topics

- Fibromyalgia
- Rheumatoid Arthritis
- Gout
- Hepatitis C
- Psoriatic Arthritis
- Lupus
- Ankylosing Spondylitis
